

## Aspen Teacher Pages

Teachers can create their own class pages within Aspen. If a teacher has a page, they may set it to be available to students and/or parents in that class section. You can access any available pages by logging into Aspen and choosing Page Directory in the far left side below the pages top tab. This will show icons for available pages that can be added. Once you add them you will see them, you will then be able to view them by clicking on the name of the class page that appears under the academic tab on the left side of your page.

NOTE: Not all teachers will have class pages.
